Search for an eBook

There are 3 ways you can search for an eBook, this depends on the level of detail you wish to search with.

Quick Search

This is found in the green box across the top of the screen. This is a perfect

tool for making general searches for books containing a single word. For example if you wanted to find all books with a title containing the word "childcare", this is your best option.

Browse

Use the browse tool found on the left side of the page to search by category. This is perfect for looking at all books within a single field study. Here you'll get a drop down list of all subject areas, just click

of

Advanced Search

[Home](#)[Bookshelf](#)[Advanced Search](#)[Help](#)

The advanced search option can be found along the top of the screen in the green tab. This is where you can do a more detailed search. Using this function you can search by author, title or by using keywords you want your books to contain. This is the best tool to use if

Selecting Your eBook

Once you've found an eBook of interest, you have 3 options of what to do next.

Read Online

This allows you to read the book in the web browser you've accessed the platform through. Make sure you have pop-up blocker disabled as this will prevent the book from opening.

Download (Limited to 1 day)

In order to download an eBook you must have first installed the VLE app to your device. This can be found by searching "VLE" in your device's app store. Once the app has been installed on your device, you can download books into it for an agreed length of time.

Bookshelf

This is your read later option. By clicking this option you can add books to read at a later date. Your bookshelf can be found in the green box near the top of your homepage.
