

## **PHASE 3: Proposed improvements to the construction and engineering facilities at Langley College**

### **Proposed New Project Space**

A double height multi-trade learning environment, where students on a variety of construction and engineering related courses can undertake practical projects at an appropriate scale to replicate a realistic work environment.

### **Proposed New Carpentry Workshop**

New specialist workshops for trades such as carpentry, which will feature the latest industry standard equipment and technology, to ensure students develop the very latest skills required in the workplace.
